SOOHYUN CHOI

800 W CAMPBELL RD, RICHARDSON, TX 75080
SOOHYUN.CHOI@UTDALLAS.EDU

EDUCATION

University of Texas at Dallas, Richardson, TX, USA (Expected) May 2023
Ph.D. in Economics
"U.S. Income Volatility and Interstate Migration" (Chair: Seth Giertz)

Yonsei University, Seoul, South Korea Aug 2011
M.A. in Economics

Sogang University, Seoul, South Korea Aug 2009
B.S. in Mathematics and B.A. in Economics (Magna Cum Laude)

TEACHING AND RESEARCH EXPERIENCE

Visiting Assistant Instructor, Austin College
ECO101, Principles of Microeconomics Fall 2022
ECO102, Principles of Macroeconomics Fall 2022

Adjunct Instructor, Austin College
ECO101, Principles of Microeconomics Spring 2022
ECO102, Principles of Macroeconomics Spring 2022

Instructor, University of Texas at Dallas
ECON4302, Urban and Regional Economics Summer 2021
ECON2302, Principles of Microeconomics Fall 2020, Spring 2021, Fall 2021

Teaching Assistant, University of Texas at Dallas
ECON3315, Sports Economics Spring 2022
ECON4355, Econometrics Fall 2019, Spring 2020
ECON7309, Econometrics II Fall 2019
ECON6306, Applied Econometrics Spring 2018, Fall 2018, Spring 2019

Research Assistant, University of Texas at Dallas Summer 2019
Studied course-taking patterns in high school and academic performance in college between Texas Division I athletes and others (with Dr. Kurt Beron and Dr. Daniel O'Brien)

RESEARCH INTERESTS

Labor Economics, Public Economics, Urban Economics

RESEARCH

Working Papers:

- **Trends in Earnings Volatility for U.S. Men: 1979-2017**
  (Job Market Paper. Presented at Midwest Economic Association Annual Meeting)

This article explores how U.S. male income evolves over time, ranging from 1979 to 2017. Our goal is to better understand income dynamics by decomposing the income volatility into the *permanent component* − the long-term average − and *transitory component* − the period-specific deviation from the average. In addition, the results are compared with existing literature that uses similar variance decomposition. After constructing a pseudo panel using the Current Population Survey, I estimate the structure of income volatility using an extended semiparametric model, building on Moffitt & Zhang (2018). On average, the transitory variance explains about 70% of the total variance. The transitory variance fluctuated through the mid-1990s and declined until 2002. Since then, the transitory variance increased through 2013 and almost recovered to the level in the mid-1990s. The increase in the gross volatility around the Great Recession is primarily caused by the increase in the transitory variance, which is consistent with previous studies even though the exact year of the turning point differs across studies. Estimating the female income volatility and comparing it with that of the male are left for future research.

- **Evaluating Estimators of Tax Migration Responses**
- **Income Convergence and Regional Labor Markets in the U.S.**

PRESENTATIONS & SEMINARS (INCLUDES SCHEDULED)

Southern Economic Association Annual Conference (scheduled)	Nov 2022
Midwest Economic Association Annual Conference	Mar 2022
Brown Bag Seminar at University of Texas at Dallas	Apr 2021

FELLOWSHIPS, GRANTS, HONORS, AND AWARDS

UT Dallas DFW Research Data Center Grant	2022-2023
Fred Hill Scholarship	2022
Ph.D. Research Small Grant	2019, 2022
UT Dallas Graduate Studies Scholarship	2018-2022
Charles C. McKinney Scholarship	2019, 2021
Irving J. Hoch Scholarship	2019-2020, 2022
Honors Scholarship (Given to students with top 3% GPA)	2008

PROFESSIONAL ACTIVITIES AND SERVICE

Discussant:

Midwest Economic Association Annual Conference	2022

Session Chair:

International Conference on Data Mining Workshops	2019

PROFESSIONAL EXPERIENCE

Korea Investment and Securities, Seoul, South Korea Jul 2011– Nov 2015

Equity Research Analyst | Banks and Card Sectors

- Covered large-cap banks and credit card companies listed on the Korea Stock Exchange (total nine companies with more than $64 billion in combined market capitalization: Samsung Card, KB Financial Group, Shinhan Financial Group, Woori Financial Group, Industrial Bank of Korea, etc.)
- Published in-depth reports: Profit erosion nearly over and financial system stabilizes (Jun 2014), Insight into Korea's household debt – Systemic risk unlikely, but there is a price to pay (Oct 2012), Brace for post-European debt crisis era (Oct 2011)
- Delivered investment ideas to international and domestic investment companies
- Attended investor meetings, non-deal roadshows, and investment forums
